

## COLLEGE PREP (CP)

Welcome to Unity Concord International School. At Unity, we believe in each student's ability to succeed and grow. The American Common Core Curriculum demands high levels of academic focus and English language ability.

Unity's College Prep course of study provides grade level academic vocabulary and content. This program is designed to meet the rigorous demands of an International School.

Students who fall below grade level or struggle to understand the academic vocabulary and content may be referred to our Transitional Program (TP). TP is designed to facilitate English Language Learners who do not speak English as their first language. The curriculum will cover the same academic subjects as the mainstream CP Course. However, the content of each course will be modified to assist students who cannot access the CP Curriculum due to language deficits.

### **CP will improve a student's English reading, writing, listening and speaking skills.**

Students who enter the CP program participate for a minimum of 1 semester. Each student will have an Individual Learning Plan (ILP) to help focus their studies. Continuous Assessment, Progress Reports and Standardized Assessments will be used to evaluate student's progress.

### **Student's will continue in the College Prep Program as long as they are meeting the grade level expectations.**

Minimum Requirements: CP program students must score at least the median class average of the CP students on their STAR 360 exam.

CP is offered at no additional charge; however, if students are not progressing in the CP program, they may be referred to TP and/or UP.
